Pfizer Announces a **Research Grant RFP**

**2021 Ulcerative Colitis Competitive Grant Program – using Expert Review Panel**

Pfizer Global Medical Grants (GMG) supports the global healthcare community’s independent initiatives (e.g., research, quality improvement or education) to improve patient outcomes in areas of unmet medical need that are aligned with Pfizer’s medical and/or scientific strategies.

Pfizer’s GMG competitive grant program involves a publicly posted Request for Proposal (RFP) that provides detail regarding a specific area of interest, sets timelines for review and approval, and uses an expert review panel (ERP) to make final grant decisions. Organizations are invited to submit an application addressing the specific gaps in research, practice or care as outlined in the specific RFP.

For all Investigator Sponsored Research (ISRs) and general research grants, the grant requester (and ultimately the grantee) is responsible for the design, implementation, sponsorship, and conduct of the independent initiative supported by the grant, including compliance with any regulatory requirements. Pfizer must not be involved in any aspect of study protocol or project development, nor the conduct or monitoring of the research program.
## Competitive Grant Program Eligibility

### Geographic Scope
- United States

### Applicant Eligibility Criteria
To be eligible:
- The institution and principal investigator (PI) must be based in one of the eligible countries noted above.
- Only organizations are eligible to receive grants, not individuals or medical practice groups.
- The applicant (PI) must have a medical or postdoctoral degree (MD, PhD, or equivalent), an advanced nursing degree (BSN with a MS/PhD), or a degree in Pharmacy, Physiotherapy, or Social Work.
- Applicant must be affiliated with a host institution
- Both early career and experienced investigators are encouraged to apply and consideration will be given to all proposals meeting the selection criteria

**Area of Interest Focus**

The intent of this Request for Proposal (RFP) is to support both clinical and basic science research on the pathogenesis and treatment of Ulcerative Colitis (UC) with a specific focus on projects that are most relevant to improving patient care.

All US investigators are encouraged to apply, including young investigators who are in the early stages of their career. At least one award will be reserved for a young investigator.

**Specific areas of interest include**

- **Clinical research:**
  - Improving UC management through treat-to-target strategies or innovative symptom monitoring (e.g., studies investigating the use of technology).
  - Understanding predictors of response to tofacitinib and utility of biomarkers in the management of UC.
- **Translational research:**
### Expected Approximate Monetary Range of Grant Applications

- Individual projects requesting up to $150,000 for clinical research and up to $75,000 for translational research will be considered.
- The amount of the grant Pfizer will be prepared to fund for any project will depend upon the expert review panel’s evaluation of the proposal and costs involved, and will be stated clearly in the approval notification.

### Key Dates

- RFP release date: November 17, 2020
- Submission Deadline: *February 16, 2021*  
  [Please note the deadline is 23:59 Eastern Time (New York, GMT -5).]
- Review of Full Proposals by ERP: April 2021
- Anticipated Full Proposal Notification Date: May 2021

### How to Apply

- Please go to [www.cybergrants.com/pfizer/Research](http://www.cybergrants.com/pfizer/Research) and sign in. First-time users should click "Create your password".

Requirements for submission:

- Select the following Competitive Grant Program Name: **2021 I&I L: Ulcerative Colitis Competitive Research**
- Complete all required sections of the online application. See Appendix A for additional details
- If you encounter any technical difficulties with the website, please click the “Technical Questions” link at the bottom of the page

### Questions:

- If you have questions regarding this RFP, please direct them in writing to the Grant Officer, Amanda Solis ([Amanda.solis@pfizer.com](mailto:Amanda.solis@pfizer.com)) with the subject line “2021 I&I L: Ulcerative Colitis Competitive Research.”
- Please click [here](http://www.cybergrants.com/pfizer/Research) to view Frequently Asked Questions regarding the Competitive Grant Program

### Review and Approval Process

- Grant requests received in response to a specific RFP are reviewed by an expert review panel (ERP) to make final grant decisions.
- The panels are comprised of professionals from the medical community with advanced degrees and expertise in particular clinical areas, or

- Understanding the role of JAK-STAT signaling in the pathophysiology or disease progression of IBD. Studies exploring the relationship between JAK-STAT and either platelet or endothelial biology and its impact on VTE risk will be considered.
- The application of proteomic, transcriptomic, and genomic techniques to predict disease progression or treatment response in IBD.
- A multi-omics understanding of the microbiome in IBD.
specific needs of a geographic region/learner group, or expertise in research, continuing professional development or quality improvement

| Mechanism by which Applicants will be Notified: | All applicants will be notified via email by the dates noted above  
• Applicants may be asked for additional clarification during the review period |

---

**Appendix A**

**Full Proposal/Protocol**

Applications will be accepted via the online portal. Full Proposal/Protocol documents should be no longer than 10-15 pages in length (12-point font and 1-inch margins) excluding Organization Detail and References. When uploading your Full Proposal/Protocol please ensure it addresses the following:

| Goals and Objectives | • Provide the main goal of the study and the study population (if applicable). Provide a detailed definition that is directly linked to the primary objective |
| Assessment of Need for the Project | • This should reflect your study rationale. Provide a brief description of the medical/scientific question and the rationale of how this trial or study addresses the question |
| Target Audience | • Describe the primary audience(s) targeted for this project. For Investigator Sponsored Clinical Trials, please specify the age, gender and other demographic information for trial population  
• Also indicate whom you believe will directly benefit from the project outcomes. Describe the overall population size as well as the size of your sample population |
| Project Design and Methods | • Describe concisely the research design and methods for achieving the stated goals. For a clinical interventional study, include inclusion/exclusion criteria, treatment plan and statistical plan |
| Innovation | • Explain what measures you have taken to assure that this project idea is original and does not duplicate other projects. Describe how this project builds upon existing work, pilot projects, or ongoing projects developed either by your institution or other institutions related to this project |
| Evaluation and Outcomes | • Specify type and frequency of safety, efficacy, and/or outcome measures. Also indicate the method(s) used to assess measures  
• Provide a publication plan describing intended submission of abstracts to (a) congress(es) or intended submission of (a) publication(s) to peer-

| Additional Information          | • If there is any additional information you feel Pfizer should be aware of concerning the importance of this project, please summarize here  
• Early-career applicants: Letter(s) of support from mentor(s) and collaborators describing how the award will advance the applicant’s career. |
| Organization Detail             | • This information is used to assess the capability of the organizational resources available to perform the effort proposed. Identify the facilities to be used [laboratory, animal, clinical and “other”]. If appropriate, indicate their capacities, pertinent capabilities, relative proximity and extent of availability to the project |
| References                      | • Bibliography of relevant references.                                                                                                                                                                    |
