

I JUST WANT MY COUGH TO GO AWAY!

Our office is helping with a medical research study that is evaluating an investigational cough medication for children. Learn more about this opportunity.

In this research study, doctors want to evaluate an investigational drug that contains an approved ingredient found in many cough medications. Participation in this study will last 4 to 6 days, which includes 4 days of dosing and at least 3 study clinic visits.

To pre-qualify for this study, your child must:

- Be 6 to 11 years of age
- Have a cough and other symptoms consistent with a common cold or upper respiratory tract infection (URTI)
- Have developed symptoms within 3 days of joining the study

All study-related visits, tests, and drugs will be provided to participants at no cost. In addition, reimbursement for reasonable expenses and travel may be provided.
